HPT 604-BS

Submersible Fuel Level Pressure Transmitter With Magnetic Suction End Cap

Applications

- Level Measurement in bio-fuels
- Monitoring of diesel fuel tanks
- Level Measurement in ballast tanks
- Level Measurement in oil tanks
- Process control Level
- · Level Measurement in water tanks

Features

- Imported pressure chip, 0.5% F.S
- Survives in harsh environments
- EMI/RFI Protection
- Custom level ranges from 0.5mto 50m
- Unique impurities filter mesh design
- IP68 full sealed plastic waterproofdesign
- · CE, ROHS and ATEX approved
- · Custom PUR or FEP cable lengths

Profiles

HPT604-BS type is a submersible fuel level transducer suitable for fuel level and depth measurement. It consists of an Germany imported FS piezoresistive sensing element encased in 304SS housing. It's all stainless steel, the hermetically sealed housing makes it suitable for immersion in most industrial liquids and oils.

This submersible level transducer is designed with a magnetic suction end cap to fix the sensor at the bottom of the tanks or vessels and prevent the sensor shaking in the liquid. Two designs are provided for static and moving fuel tanks separately. This design will eliminate the negative effect of shaking on measurement accuracy.

The HPT604BS incorporates lightning and surge protection and it utilizes dual arrestor technology, and assures normal work under the input and output short-circuit conditions to prevent reverse connection. And it eliminates both power supply surges and lightning ground strike transients.

Holykell provides cost-effective solutions for level monitoring for a variety of applications. Welcome to your inquiry.

Measuring range						
bar	0 to 0.05 0 to 5					
inWC	0 to 20 0 to 2000					
psi	0 to 1.0 0 to 72.5					
mH2O/Fuel	0 to 0.5 0 to 50					

When order sensor for gasoline/petrol, please choosing the FEP cable. The given measuring ranges are also available in mbar, KPa and MPa

Materials

Wetted Parts	Standard	Optional
Sensor	Stainless steel 316L	NA
Housing & Protection cap	Stainless steel 304	316L/PVDF/Nylon
Cable	PUR	FEP

Mounting position

Calibrated in vertical mounting position with pressure connection facing downwards.

Accessories

HOLYKELL

(Notes: Please purchase separately. For the price of accessories, please contact our sales.)

	Description	Order number
	Liquid level display control device With all kinds of liquid level sensor, measurement according to liquid level, and according to the setting of the container structure and size and the density of liquid, calculation, display liquid volume or quality.	0008
	Locking flange For locking cables, made of aluminum alloy	0029
	IP68 rated deep water level cable extender Mainly used to extend the cable of deep water level transmitter. Users can rewire it locally. It can work continuously for more than 10 years 500 meters underwater, and the safe tensile strength of the cables at both ends can reach 200N	0028
	Desiccant drying cartridge Desiccant Pack installed on Vented Transducer cable.The cartridge will have to be field replaced as site environment requires.	0010
T	Terminal box The terminal box, with IP67 ingress protection and watertight ventilation element, provides a moisture-free electrical termination for the submersible pressure transmitter. It should be mounted in dry environment or directly in the switch cabinet.	0003
100	Adapter Converter It is able to convert RS-232 signal to RS-485 balanced differential signal and extend the communication distance to 1.2km.It uses a particular pump to gain power from RS-232 signal (RTS, DTR, TXD) without initializing the RS-232 series interface.This interface converter does this without requiring any AC or DC power.	0005
	Surge electrostatic protector Anti-surge ±2000V/±4000V, anti-static 18KV, suitable for protecting 4-20ma and RS485 circuits.	0014
